(57) Abstract

An online patent and license exchange is provided which enables potential licensors and licensees of patents and other intellectual property rights to efficiently and reliably transact IP license or assignment agreements. Three markets are part of the exchange: a license market, an option market and a securitized asset cash flows market. The online patent and license exchange comprises a comprehensive database of IP rights offered for licensing on the exchange, including a reliable market value estimation of the price of each IP asset listed on the exchange, a transaction closing service, a patent insurance service and an escrow service.
